Software Engineer with **3+ years** of experience in **Frontend development**, specializing in crafting intuitive, visually refined, and high-performance web applications. Strong focus on **UI/UX design principles**, including usability, accessibility, and interaction design, ensuring seamless and engaging user experiences. Skilled in building scalable, secure, and responsive interfaces while translating complex requirements into clean, user-centric solutions. Passionate about solving real-world problems through thoughtful design and efficient development. Seeking to contribute to a dynamic team to create impactful digital products and drive continuous innovation.

AREA OF EXPERTISE

React JS	HTML-5 & CSS-3	GSAP	Python / Django	Adobe Photoshop & Canva
JavaScript (ES6+)	Tailwind CSS	Figma	Git & GitHub	Cross-Browser Compatibility
Redux	Bootstrap	MySQL	Docker	Agile Methodology

PROFESSIONAL EXPERIENCE

Software Engineer

RSGP Consulting Private Limited

Technopark Phase III, Kazhakkootam, Kerala

May 2023 - Present

- Collaboratively designed and developed a full-featured word document editor similar to Google Docs, with a strong focus on structured XML conversion and real-time collaboration. Led the complete frontend engineering effort using React.js, ProseMirror, and TipTap to build an advanced, futuristic editing experience. The project included article management, a collaborative editing environment, rich text formatting tools, commenting functionality, tracked edits, version history, and seamless document synchronization.

TECHNOLOGIES USED

React.js, Tiptap, ProseMirror, and Laravel with MySQL

Junior Software Engineer

Cyber Prism Software Solutions

Crown Plaza, Hostel Junction, Muvattupuzha, Kerala

Aug 2022 - May 2023

- Medical Retail, Inventory Management**

This is a web-based application, which is mainly used for the booking and inventory management within a medical shop. Inventory management helps in refilling of stock out medicines if it reaches a particular threshold. Administrator role was built for the management of users and medicines. The main purpose of the pharmacy is to accept user orders and update stock depending on the availability of medicines

TECHNOLOGIES USED

HTML-5 & CSS-3, PHP, MySQL

- Constructions Equipment Management**

A complete platform for managing the hiring of construction equipment. Users can browse and book various types of construction machinery directly through the site. The system also includes functionality to identify and verify customers who are eligible to hire equipment from the company.

TECHNOLOGIES USED

HTML-5 & CSS-3, Python / Django, MySQL

PROFESSIONAL EXPERIENCE (Independent)

- Absolute Ayurveda**

Absolute Ayurveda, a premium wellness website that embodies luxury, tranquility, and holistic living. Built with Next.js 14 for optimized performance and SEO, styled using Tailwind CSS for a clean and scalable design system, and enhanced with Framer Motion to deliver smooth, immersive animations.

TECHNOLOGIES USED

React, Vite, Tailwind CSS + custom CSS, Framer Motion, Next.js 14

- **Indo-Shah Aluminium & Interiors**

A modern, high-performance corporate web platform engineered for Zentiq Consulting, a premier international business growth and sales advisory firm. Built with React, TypeScript, Vite, Tailwind CSS, GSAP ScrollTrigger, and Framer Motion.

TECHNOLOGIES USED

React, Vite, Tailwind CSS + custom CSS, Framer Motion

- **Zentiq Consulting Services**

A local-network multiplayer social deduction party game. One player is secretly the Imposter — everyone else must figure out who it is through clue-based chat rounds!

TECHNOLOGIES USED

React 18, TypeScript, Vite 6, Tailwind CSS, Framer Motion, GSAP & ScrollTrigger, Lenis, Lucide React

- **Press Club Thiruvananthapuram**

Developed a responsive Strong Password Checker using React and Vite, providing real-time password strength evaluation based on length, character composition, and entropy rules. Implemented visual feedback indicators, clean UI design, and lightweight, high-performance frontend architecture.

TECHNOLOGIES USED

React 19 + Vite 8, Tailwind CSS v4 (Vanilla CSS Tokens), Framer Motion, Lucide React, Canvas Confetti

- **RUM - Bow-Bow Geofence Alarm App**

RUM is a premium, real-time location-based geofence alarm and transit companion application built with React Native and Expo. Designed for commuters, travelers, and adventurers, RUM ensures you never miss a stop on buses, trains, or road trips by playing customizable offline alarms as you approach your destination perimeter.

With customizable pet companions (dogs, cats, rabbits, birds, fish), background location tracking, dynamic early pre-warning distance alerts, accurate moving speed & ETA calculation, multi-geofence management, user profile customization, a custom theme design system, and offline synthesized audio, RUM delivers a smooth and delightful travel experience.
